

REFERENCES

Through psychiatry's stigmatizing labels, false explanations, easy-seizure commitment laws and often brutal, depersonalizing "treatments" and deadening, mind-altering drugs, thousands needlessly fall into psychiatry's coercive system every day all over the world. It is a system which exemplifies human rights abuse.

While CCHR does not provide medical or legal advice, it advocates thorough medical screening to check for any physical illness that can be medically treated.

Before you stop taking any psychiatric drug, you need to seek the advice and assistance of a competent non-psychiatric medical doctor.

Use the following references at your own discretion.
